

P G M V M T

Your Programme Guide.

How it all works

*Move well, perform better
Kia neke pai!*

@PERAGIBBS_MVMT

WELCOME TO YOUR PROGRAMME.

You're now part of the PGMVMT athletic development system. This document covers everything you need to get started. Keep it simple, trust the process, and show up consistently — and the results will come.

Your programme tier and testing level are confirmed on your profile. Foundation athletes (V1) follow a self-guided programme. Advanced athletes (V2) receive full week programming and weekly check-ins

GETTING SET UP ON TEAMBUILDR

- Download the TeamBuilder app from the App Store or Google Play.
- Check your email for your login details — sent when your profile is created.
- Log in and your programme will be ready and waiting.
- Log each session after you complete it. This data tracks your progress.

COMMUNICATION

- All coaching communication happens through TeamBuilder — message me directly in the app
- I respond within 48 business hours.

YOUR 12-WEEK BLOCK

- **Week 1:** Introduction. learn the movements.
- **Week 2:** Baseline testing (PGMVMT Big Five).
- **Weeks 3–6:** Build. Same exercises, load increases weekly. This is where the foundation is set.
- **Week 7:** Reload. New exercises, drop back to comfortable before we push again
- **Week 8-10:** Execute. This is where we sharpen up and perform.
- **Week 11:** Retest. Measure your progress against week 2.
- **Week 12:** Deload and reset. Review, recover, and set goals for the next block.

Note:

At week 12 we review your results, set goals for the next block, and confirm your re-sign. Most athletes roll straight into block 2 — this is where long term athletic development happens.

From block 2 onwards: Week 6 includes a retest and the same again at week 11. Each new block builds on the last.

This may vary depending on your version of programming as goals/key dates for V2 will be factored in.

IF YOU GET INJURED

Minor niggles:

- Modify or skip the affected exercise and continue with the rest of the session. Use your judgement.

Significant injury:

- Pause training and consult a medical professional before returning. Message me in the app to let me know.

Please note: individual programme modifications for injury are not included in the Foundation programme. If you require ongoing injury management and programme adjustments, this is available through the Advanced programme. Speak to me about upgrading.

PGMVMT TESTING — YOUR BENCHMARKS

Test	Measure	Applies to
Bronco	Fitness	All athletes
Broad Jump	Lower Body Power	All athletes
Push Up (max reps)	Upper Body Strength	Tier 1
Bench Press (1-3RM)*	Upper Body Strength	Tier 2 & 3
Trap Bar Deadlift (1-3RM)*	Lower Body Strength	Tier 2 & 3
Chin Up (max reps or 1-3RM)*	Upper Body Strength	Tier 1 & 2: MR Tier 3: 1-3RM

Tier 1 Athletes = 4 tests

Tier 2 & 3 Athletes = 5 tests

***I'll speak directly to you about performing 1RM's.**

UNDERSTANDING YOUR LOAD (RIR AND RPE)

Your programme uses Repetitions in Reserve (RIR) as the primary load guide — how many reps you could still do at the end of a set. RPE (Rate of Perceived Exertion) is shown alongside as a cross-reference.

RPE	RIR	What it feels like
5 – 6	5	Easy. Movement focus. No fatigue.
7	4	Working hard but in control.
8	3	Hard. Starting to feel uncomfortable.
9	2	Very hard. Last rep is a grind.
10	0 – 1	Maxing out.

SPEED & CONDITIONING

Your gym programme develops muscle, strength, power, and athleticism. Conditioning is an important piece of the puzzle — particularly for your Bronco score.

The recommendation for foundation athletes is 1-2x conditioning sessions per week to support their fitness base. Slot them around your club training and games (depending on stage of season).

Weekday

- 30 min easy jog or bike at conversational pace

Weekend

- 45 min easy jog or bike at conversational pace

That's it. Simple and effective.

Advanced athletes receive a fully programmed speed and conditioning schedule as part of their weekly plan — including dedicated sprint sessions, repeat effort work, and capacity building.

If you want every detail of your training week covered, speak to me about upgrading to Advanced.

TESTING PROTOCOL

Bronco

- 20m, 40m, 60m shuttle x5 (non-stop)
- Record total time

Broad Jump

- Standing jump. Toes behind line and measuring (in CM) from the back of your heels where you land (must stick landing)

Press Up

- AMRAP (no rest in between)
- From chest to floor to full extension = 1 rep

Bench Press (Barbell)

- Build to a 1-3-rep max.
- From bar to chest to full extension = 1 rep
- Record load in kg.
- Insure you have a spotter.

Trap Bar Deadlift

- Build to a 1-3-rep max. Record load in kg. maintain form throughout

Chin Up

- Build to a 1-3-rep max weighted (tier 3 only)
- AMRAP from dead hang to chin over bar.
- No kipping
- Bodyweight only

Form is paramount for any testing. If you cannot maintain appropriate form- stop the test!
Film all tests and upload to Teambuidr app so I can verify

MISSED A SESSION

One missed session — continue from where you are. Don't try to catch up.

Two or more missed — message me in the app.

Injury or illness — stop training and message me immediately.

P G M V M T

CONSISTENCY > INTENSITY

The one who shows up every week
is the one who achieves their goals

KIA KAHA

be strong

KIA MAIA

be brave

KIA MANAWANUI

be resilient

KIA MĀRŌ

stay hard
