

P G M V M T

Your Programme Guide.

How it all works

*Move well, perform better
Kia neke pai!*

@PERAGIBBS_MVMT

PGMVM T

WELCOME TO YOUR PROGRAMME.

You're now part of the PGMVMT athletic development system. This document covers everything you need to get started. Keep it simple, trust the process, and show up consistently — and the results will come.

Your programme tier is confirmed on your profile. Foundation runners (V1) follow a self-guided run programme. Advanced runners (V2) receive full weekly programming — running, strength, and recovery — with weekly check-ins.

GETTING SET UP ON TEAMBUILD

- Download the TeamBuildr app from the App Store or Google Play.
- Check your email for your login details — sent when your profile is created.
- Log in and your programme will be ready and waiting.
- Log each session after you complete it. This data tracks your progress.

COMMUNICATION

- All coaching communication happens through TeamBuildr — message me directly in the app
- I respond within 48 business hours.

YOUR 12-WEEK BLOCK

- **Week 1:** Introduction. learn the movements.
- **Week 2:** Baseline testing
- **Weeks 3-6:** Build. Volume increases weekly. This is where the foundation is set.
- **Week 7:** Reload. Drop back to comfortable before we push again
- **Week 8-10:** Execute. This is where we sharpen up and perform.
- **Week 11:** Retest. Measure your progress against week 2.
- **Week 12:** Deload and reset. Review, recover, and set goals for the next block.

Note:

At week 12 we review your results, set goals for the next block, and confirm your re-sign. Most athletes roll straight into block 2 — this is where long term athletic development happens.

From block 2 onwards: Week 6 includes a retest and the same again at week 11. Each new block builds on the last.

This may vary depending on your version of programming as goals/key dates for V2 will be factored in.

IF YOU GET INJURED

Minor niggles:

- Modify or skip the affected exercise and continue with the rest of the session. Use your judgement.

Significant injury:

- Pause training and consult a medical professional before returning. Message me in the app to let me know.

Please note: individual programme modifications for injury are not included in the Foundation programme. If you require ongoing injury management and programme adjustments, this is available through the Advanced programme. Speak to me about upgrading.

TESTING — YOUR BENCHMARKS

Testing is how we measure progress and set your training paces. Your test distance and timing are confirmed in your programme on TeamBuildr.

Programme	Test	When
Base	5km Time Trial	W2 + W11
Build	5km Time Trial	W5 (5km)
½ Marathon	10km Time Trial	W10 (10km)
Execute	5km Time Trial	W5 (5km)
Marathon	10km Time Trial	W8 (10km)

MISSED A SESSION

One missed session — continue from where you are. Don't try to catch up.

Two or more missed — message me in the app.

Injury or illness — stop training and message me immediately.

UNDERSTANDING INTENSITY (RPE)

Your programme uses RPE (Rate of Perceived Exertion) as the primary effort guide. Every session has a target effort — stick to it. Going too hard on easy days is one of the most common mistakes runners make.

RPE	What it feels like
5 – 6	Easy. Conversational pace. Able to speak in full sentences.
7	Comfortably hard. Short sentences only.
8	Hard. Starting to feel uncomfortable.
9	Very hard. Last rep is a grind.
10	Maxing out.

Most of your training should sit between RPE 5–7. Hard days are hard — easy days must be easy.

HOW TO RUN YOUR TIME TRIAL

Complete at either a running track or a route that is flat and has minimal changes of direction or obstacles/things that may get in the way or slow you down (e.g. traffic lights or busy intersections)

- Warm up with 10–15 min easy running before you start (include some strideout at or above your target race pace)
- Run at a controlled maximal effort — even pacing, not a sprint and fade
- Cool down with 10 min easy after
- Log your time in TeamBuildr immediately
- Record from start to finish on your watch or phone (ideally linked to Garmin or Strava)

Pacing is paramount. Stick to your target time km splits and don't go out too hard

STRENGTH TRAINING

V1 runners

- Receive some basic strength/preparation work but this is primarily a running programming only

V2 runners

- Receive full weekly programming — running, strength, and recovery fully integrated

If you want strength work built into your week, speak to me about upgrading to Advanced.

P G M V M T

CONSISTENCY > INTENSITY

The one who shows up every week
is the one who achieves their goals

KIA KAHA

be strong

KIA MAIA

be brave

KIA MANAWANUI

be resilient

KIA MĀRŌ

stay hard
